DETAILED ACTION

Election

Applicant's election with traverse of Group I in Paper dated April 26, 2004 is acknowledged. The said group I consists of Claims 1-4 and 9-12 drawn to a series of compounds of Formula I and compositions comprising the same, wherein variable Q is an optionally substituted aliphatic organic amine containing at least one nitrogen atom which together with a proton forms a quaternary ammonium cation QH+.

The traversal is on the grounds that:

- The compounds, compositions and methods of administration of the claims are related to the same invention because they are all directed to compounds of formula I
- In all claims the variable Q contains one or more nitrogen atoms, which together
 with a proton forms a quaternary ammonium cation QH+
- The said salts are not patentable distinct over each other
- They are directed to perform the said function
- The methods of use and manufacture each particular salt should not be considered patentably distinct.

This is not found persuasive because:

 Each cation has its particular chemical structure and functionality and different classification, thus while described as compound of formula I they are indeed quite chemically different. The fact that all moieties contain a nitrogen atom does not mean that all of then are similar in its chemical behavior of functionality.

Art Unit: 1625

- Each salt does not require to be used together with the others in order to achieve the claimed method of used
- The novelty of the invention rests in the nature of the Q variable since other
 Combrastatin phosphonic salts containing nitrogen in the Q ammonium anion
 are already known in the art, see for instance, Petit et al, US patent 5661122
 (1996).
- Each one of the above Inventions are different from each other because a given reference anticipating or suggesting one of the salts under the meaning of 35
 USC 102 or 35 USC 103, respectively, cannot be used to reject any of the other invention under 35 USC 102 or 35 USC 103.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

Art Unit: 1625

ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 9-12 are rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6670344 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the already allowed salts described in claim 1 is an specie embraced by the genus described in claim 1 of the elected group of the instant application. Thus pharmaceutical compositions as described in allowed claims 2 and 3 are embraced in claims 9-12 of the instant invention

This is a double patenting rejection.

CONCLUSION

Any inquiry concerning this communication should be directed to Hector M. Reyes whose telephone number is (571) 272-0691. The examiner can normally be reached on Monday to Friday from 9am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner 's supervisor, Ms. Rita Desai can be reached on (571) 272-0684. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556 or for regular communication and (703) 308-4242 for After Final communications.

Art Unit: 1625

Any inquiry of a general nature or relating to the status of the application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
